

**Ocean & Environmental Solutions  
for  
Measuring – Sampling – Enabling**

## About Swale

**Swale Technologies** has been supplying quality instrumentation and equipment to a wide range of customers throughout the UK and Europe for over 30 years. Our customers include government bodies such as environmental and fisheries agencies, universities and research establishments as well as civil engineering, defence, dredging, oil & gas, ports, renewable energy, and survey operators.

## Equipment & Instruments:

- Acoustic Release Modules
- ADCP current profilers & wave sensors
- Altimeter and Attitude Sensors
- Anti-fouling
- Argo Profiling Floats
- Autonomous Surface Vehicles (ASVs)
- Autonomous Underwater Vehicles (AUVs)
- CTDs
- Current meters (velocity & direction)
- Data Recorders – multi-parameter probes
- Databuoys, Drifters & ARGO Profilers
- Diver Imaging boards
- Flotation
- Flow Meters
- Hydrophones
- Locators & Pingers
- Modems (Acoustic & Inductive)
- Mooring hardware
- Mounts & Frames (Trawl Resistant)
- Oil-Spill sampling kits
- Passive acoustic monitoring
- Pingers, Transponders & Receivers
- Plankton Nets
- Pop-up Buoys
- ROVs & ROTV (towed body)
- Rugged Computers
- Sediment corers & Grabs
- Sensors
- Side Scan Sonar
- Strain-Gauge loggers
- Sub-Bottom Profilers
- Telemetry
- Trackers
- USBL & LBL Positioning
- Water sampling – Rosettes & Niskin bottles
- Wave and Tide recorders
- Winches
- XBTs, Interface & software

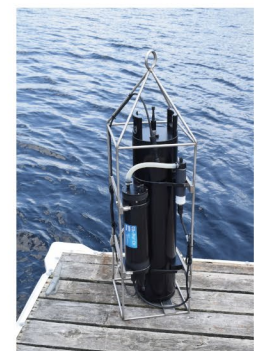

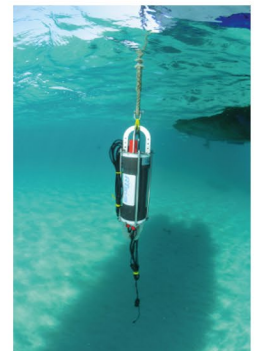

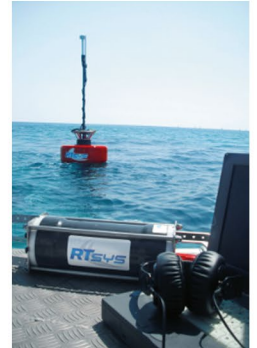

## Capabilities & Applications

**Swale** are dedicated to assisting customers in monitoring and protecting the aquatic environment by supplying high quality instrumentation and equipment. We represent some of the world's most long-established manufacturers, with outstanding reputations in the market for functionality, engineering and reliability. We offer simple equipment, sophisticated instruments or turnkey solutions.

### Applications:

- Acidification Studies
- Anti-fouling & Corrosion
- Asset Location & Recovery
- Bathymetry
- Benthic Survey
- Coastal Engineering
- Dredge monitoring
- Ecology
- Fisheries & Aquaculture
- Geophysical
- Hydrography
- Inspection
- Leak Detection
- Limnology
- Marine Mammal Research
- Moorings – Releases & Floats
- Noise Monitoring
- Oceanography
- Offshore
- Pipeline Detection
- Ports & Harbours
- Positioning & Location
- Renewable Energy
- Search & Recovery
- Sedimentology & Scour
- Surveying
- Telemetry
- Water Quality
